

Alexandre Vives Lliset

Data Scientist

Phone: +1 (917) 257-4883 | Email: alexxvives@gmail.com | LinkedIn: [alexandrevives](#) | [Detailed resume](#)

TECHNICAL EXPERIENCE

Santander Bank, Boston, MA, United States *Associate Data Scientist* Jun 2023 - Present

- Built a supervised learning Customer Lifetime Value model predicting 2-year profitability per customer to integrate into marketing campaigns.
- Model insights shifted strategy from **volume-driven acquisition** to **quality-driven targeting**, leading to an 18% lift in avg deposits per campaign.
- Built a credit risk FICO score approximation model **reducing expensive bureau pulls by ~60%**.
- Integrated into onboarding to enable instant credit decisions, skip unnecessary bureau pulls and expanding access for thin-file (no FICO) customers.
- Designed white-box system leveraging 1,000+ customer segments flags to score users into deciles by product affinity, validated via A/B testing.
- The system automatically updated with rolling 90-day data, requiring no retraining and delivered a **29% lift in product openings** per campaign.
- Built a causal inference uplift model using treatment/control data to predict incremental response to credit card campaigns.
- Deployed prioritizing high-uplift segments, **increasing acquisitions by 15% with the same marketing budget**, thus optimizing marketing ROI.
- Deployed models in Snowflake for automated monthly scoring and integrated outputs into dashboards in Streamlit for **non-technical stakeholders**.

Meta (Facebook), New York, NY, United States *Data Scientist Intern* May-Aug 2022

- Analyzed **buyer retention** on Instagram Shopping tab, uncovering key behavioral drivers to **guide retargeting** and product strategy.
- Delivered recommendations, **adopted** by product teams, including new engagement features and **optimized post-purchase remarketing**.

Hewlett-Packard, Boise, ID, United States *Data Science Intern* Jan-May 2021

- Developed **time-series forecasting** models (AR, MA, ARIMA, SARIMA) to predict printer sales.
- **Improved forecast accuracy by ~27%**, supporting supply chain teams with better production and distribution planning.

Research at Purdue University – Edward J. Delp *Research Assistant* Sep-Dec 2020

- Developed a **computer vision system** to detect, segment, and classify food from self-reported images.
- Built a CNN model **from scratch** and later fine-tuned with ResNet-50, results were published and presented at Purdue's Research Conference.

Research at Purdue University – Mario Ventresca *Research Assistant* May-Aug 2020

- Built a **stochastic simulation** in R of Tippecanoe County, using a synthetic population, daily schedules, and probabilistic transmission mechanics.
- Evaluated the spread of Covid-19 in that simulation as well as the effectiveness of several mitigation strategies (masks, school closures, WFH).

LEADERSHIP EXPERIENCE

Scope Consulting, Purdue University *Project Acquisition Director* Sep 2019-Present

- Founded the consulting club Scope Consulting founded reaching 50 members in its first year.

PERSONAL PROJECTS

Music Recommendation Engine June 2025

- Applied an unsupervised learning **Gaussian Mixture Model** to **cluster songs** by features such as energy, danceability, tempo, and valence.
- Built a **content-based recommendation** system using **cosine** to suggest new tracks aligned with playlist characteristics.

HackGPT, New York Hackathon Apr 2023

- **Built an LLM-powered virtual psychologist** prototype simulating a FaceTime-style therapy session.
- **Integrated** speech recognition, ChatGPT API with a custom prompt, text-to-speech, and a lip-sync avatar (done in 48h, earning 2nd place)

EDUCATION

Master's in data science at New York University **GPA: 3.81** Graduated **May 2023**

Bachelor of Science in Industrial Engineering at Purdue University **GPA: 3.64** Graduated **May 2021**
Emphasis Area in Operations Research, **Minor** in Business Management & **Certificate** in Applied Data Science

Stanford University, School of Engineering, Palo Alto, CA **GPA: 3.88** Jun-Aug 2019
Coursework: Principles and Techniques of Artificial Intelligence, Design of Algorithms, Programming Abstractions with C++

AWARDS & CERTIFICATIONS

HackGPT , Hackathon using Large Language Models	2 nd place Award	2023
Deloitte , Undergraduate Case Competition	1 st Place Award	2021
Laser Pulse Hackathon , Visualizing Venezuela's Migration Crisis in Colombia	3 rd Place Award	2020
Stanford University , Machine Learning	Coursera Course	2020
Harvard , Data Science with R	edX Course	2019
Massachusetts Institute of Technology , Computational Thinking & Modeling Simulation	edX Course	2018

OTHER DETAILS

Languages: English (Proficiency), Spanish (Native), Catalan (Native), French (Conversational)

Skills: C++, R, Python, SQL, Snowflake, Sreamlit, AWS, Predictive Modeling, Statistical Analysis, Data Visualization
